

FOCUS
INTEGRATED SYSTEMS

COMPANY PROFILE

A SHARP FOCUS ON TECHNOLOGY AND PERFORMANCE

Focus Integrated Systems (FIS) is a market leader in integrated IT solutions and security systems in the UAE, offering optimal, integrated solutions to corporate and individual clients. We have a long track record of delivering dynamic management solutions and cutting-edge technology solutions in the field of IT, LV and Security Systems with extra emphasis on product quality and customer support. As a premier systems integrator, FIS ideally creates an inherently intelligent, integrated network that suits present and future business needs of the clients. We also provide integrated business security systems that protect and manage assets as well as keep a watchful eye on the business all the time. While we stress on fast, reliable and flexible services that are seamlessly scalable to suit the customer's requirements through time, we specialize in complete, client-specific solutions starting from design, to supply, modification, installation and maintenance of new and existing systems with a prompt and cost-effective choice of alternatives. As an ISO-9001 accredited organization we are deeply committed to zero-defect performance and total customer satisfaction. Our impressive list includes long-term clients who rely on the company's competence and commitment in meeting their day-to-day requirements promptly and professionally.

PRODUCTS AND SOLUTIONS

ELV & SECURITY SYSTEMS

- Nurse Call Systems
- Intruder Alarm Systems
- Building Management Systems
- Home Automation System
- CCTV
- Access Control Systems
- Time & Attendance System

IT & COMMUNICATION

- IT Solutions
- Structured Cabling (Data & Voice)
- PABX & Phone Systems
- Visitor Management Systems
- ERP Solutions
- GPS Vehicle Tracking Systems

GATE AUTOMATION SYSTEMS

- Automatic Swing Gates
- Motorized Electric Sliding Gates
- Automatic Bollards
- Automatic Parking Barriers
- Rolling Shutters
- Industrial Entrances
- Swing Speed Gates
- Sliding Speed Gates
- Tripod Turnstiles
- Full Height Turnstiles
- Half Height Turnstile

AUDIO VISUAL SYSTEMS

- Queue Management Solutions
- Public Address Systems
- IPTV System
- SMATV (Satellite Master Antenna Television)
- Information KIOSKS
- Audio & Video Intercoms

OUR SERVICES

- Design & Installation
- Implementation Training
- Operation & Maintenance
- Comprehensive Annual Maintenance Contract (CAMC)
- Annual Maintenance Contract (AMC)
- Manpower Support Contract

PRODUCTS AND SERVICES

A SUITE OF
STATE-OF-THE-ART

IT SOLUTIONS

FIS offers IT consultancy services and solutions that align technology with the client's business objectives. Our long-term partnerships are based on measurable value creation and built on best practices and cost-effective quality service.

We offer a range of Professional IT services including:

- Fully managed services for organizations without in-house IT support
- E-security & management systems
- Onsite & offsite support and upgradation
- Storage & data solutions
- Data protection
- Network design, integration & consultancy
- WiFi hardware, WiFi hotspot, corporate Internet access and VPN connectivity

CCTV

With its breadth and depth of experience FIS is ideally positioned to advice on CCTV systems across a range of market sectors, making it one of the most effective and powerful tools for protecting business interests or premises, combating crime and ensuring security, as well as monitoring health, safety, & employee productivity. Our CCTV services cover design, installation and maintenance of systems tailor made to application needs and customer's budget.

BENEFITS

Increasing staff productivity, ensuring security, identifying criminals, monitoring inaccessible areas, deterring theft, malicious acts and vandalism, and providing close and consistent surveillance 24 hours a day, every day.

The following CCTV surveillance systems and solutions are available:

- Analog & IP cameras
- Dome, box, bullet and IR cameras
- Outdoor, indoor and PTZ cameras
- Speed dome cameras
- High resolution CCTV monitors
- Network Video Recorders (NVR)
- Digital Video Recorders (DVR)

ACCESS CONTROL SYSTEMS

FIS provides leading-edge electronic access control systems to protect business and other premises. Our innovative solutions in access control effectively address from entry level, single-door access control requirements to fully integrated security management systems operating on an enterprise-wide network.

The following access control systems are available:

- Standalone/ PC based access control system
- Convenient entry keypads (code access)
- Time & attendance system
- Intercom communication (audible verification with remote door release)
- Biometric solutions (voice/facial recognition and fingerprint verification)
- Proximity readers
- IP based audio video door entry system

GATES, BARRIERS & TURNSTILES

In order to protect sites from unauthorized vehicles and pedestrians, FIS offers an extensive range of "site protection" products.

Solutions can be chosen from the following:

- Fencing (e.g. acoustic fencing)
- Gates (Automatic hinged gates, sliding gates)
- Vehicle flow (e.g. vehicle barrier, road blocker)
- Pedestrian flow (e.g. speed gates, turnstiles)

INTRUDER ALARM SYSTEMS

FIS offers security systems to deter uninvited guests. Each system is designed individually with the client's needs and applications in mind. The configuration of the control panel will depend on client-specific design needs, varying from an audible system to a sophisticated integrated up-load/down-load management system.

HOME AUTOMATION SYSTEMS

Home automation is simplified to control and manage electrical, electronics, security and entertainment, at a touch of a finger, with a remote control. FIS can design and build a smart automated home with state-of-the-art technology making it simple to operate appliance, lighting, air conditioning and security systems, all controlled from a single platform, also allowing you to save energy and reduce utility bills. FIS offers a complete line of home automation systems that makes sophisticated home control solutions practical and affordable for every home.

PUBLIC ADDRESS SYSTEMS

We provide a comprehensive range of PA (Public Address) products, systems and services including design, installation, configuration, testing and commissioning.

FIS PA systems are ideal for venues such as:

- Shopping centers
- Hospitals
- Institutional buildings
- Commercial buildings
- Management system
- Communication system

NURSE CALL SYSTEMS

FIS advanced nurse call systems enable patients to get immediate nursing attention at the mere press of a button located near the bedside. Calls are displayed at the nursing station console indicating the location. Optional hand-held units are also provided at special beds. Special features can be provided for PC interface to record patients call and nurse response activities on a day-to-day basis thus providing a unique way to improve the quality of nursing care in hospitals. Our systems can offer press-to-call panels, wander leads, pull cords etc., which when activated can transmit the call for assistance back to a display panel identifying the location of the call and enabling swift response from the staff.

BUILDING MANAGEMENT SYSTEMS

We provide effective BMS solutions for making buildings intelligent and saving energy at the same time. Customized software packages are designed to meet specific applications of monitoring and control.

- Non-Proprietary communication protocol at all levels making the system more flexible
- Fully integrated with integrated security management system

STRUCTURED CABLING (DATA & VOICE)

Focus Integrated Systems offers integrated voice and data wiring installations for business computer networks, data centers, VoIP phone systems, and telecommunication companies throughout the UAE. Whether installing a Cat5e, Cat6, Cat6a, or Fiber Optic cabling network, FIS has the experience to build a world class communications infrastructure for your business. We always insist on quality brands and the best industry standards to ensure flawless installation, be it a new construction, business expansion, office remodeling or relocation.

The following products and services are available:

- Network design & consultancy
- Network implementation
- Network support, cabling,
- Networking, hardware, maintenance contract
- WiFi hardware, WiFi hotspot solutions,
- Workstations, hubs, switches, routers,
- Gateways, NIC, patch panels, connectors, face plates, cables, racks etc.
- Onsite & offsite support, upgradation

PABX & IP PHONE SYSTEMS

In today's corporate world an efficient business telephone system is integral to business growth and success. We offer bespoke systems to suit your needs, whether it's a simple set up for your company and home workers that you need, or a VOIP linked product for a full network of branches. We have the expertise and experience to provide you with the right equipment and support for a new solution, overcoming any issues you may have had with your previous telephone systems.

These are some of the leading manufactures we work with:

- AVAYA** High-end voice and data applications with easy to use tools enabling smaller business to function just like larger enterprises
- PANASONIC** Complete communication systems for small to medium sized companies for the last two decades
- CISCO** Flexible and reliable solutions with IP telephony without having to completely replace any existing telephone systems
- SIEMENS** Hipath telephone system to business requiring an easy-to-use communications platform
- NEC** Delivers excellent voice features at affordable prices from a global leader in telecommunications
- SAMSUNG** Advanced technology on a limited budget with powerful small business solutions.

PARKING MANAGEMENT SYSTEMS

Our advanced parking management system Park-Finder is perfected to meet modern standards of efficiency, ecology and facilitate consumer convenience. Park-Finder ensures maximum benefits to parking operators at the lowest operating costs. Parking spaces are easily accessible and the system leads the vehicle by the shortest route up to the nearest free place, saving time and fuel. It ensures clear & simple management, easier monitoring & better utilization of available space, indirectly minimizing environmental pollution and stress for drivers. The system needs low maintenance and can be easily integrated with firefighters and other sensors.

GPS VEHICLE TRACKING SYSTEMS

FIS offers this real time fleet management system that helps to improve mobile workforce efficiency, reduce fleet costs and optimize fleet efficiency to match customer-specific needs for both public and private sectors. FIS Shadow Tracker is a suite of GPS devices and software for fleet monitoring that helps large companies to reduce operating costs and manage mobile assets more efficiently. It enables to optimize vehicle utilization, reduce overtime costs, manages field personnel better with electronic timekeeping and by documenting actual routes and trips. It further adds to savings by eliminating field personnel downtime and employee fraud.

VISITOR MANAGEMENT SYSTEMS

Our visitor management system facilitates better visitor control at any organization. By means of a simple badge our location control system automatically places a virtual eye on every visitor. When a visitor enters a restricted area, the system instantly triggers an alarm, pinpoints video cameras on the visitor location, alerts security guards and sends a text message to an administrator's smart phone. You can even program the software to automatically blink or ring the visitor badge informing the visitor and employees of the security breach.

We offer a range of sophisticated products that can easily build Individual Centric Control System (ICCS) applications to leverage your existing security infrastructure. Once consolidated, it will enable automatic monitor and control visitors in authorized and unauthorized access, ensure compliance with occupational safety and health standards and improve administration and control of substances hazardous to health protocols.

MASTER CLOCK SYSTEMS

A master clock system utilizes a precision master clock to provide timing signals to synchronize slave clocks as part of a clock networks.

Focus Integrated Systems (FIS) offer a wide range of Master clocks based on standard solutions including NTP (Network Time Protocol) or Time Code driven. Central Master clock systems used in railway stations, Air ports, hospitals, schools, banks, office, industrial and commercial etc...

Our master clock products are available in various options such as,

- Standalone/ PC based access control system
- Convenient entry keypads (code access)
- Time & attendance system
- Intercom communication (audible verification with remote door release)
- Biometric solutions (voice/facial recognition and fingerprint verification)
- Proximity readers
- IP based audio video door entry system

TOUCHSCREENS & INTERACTIVE DISPLAYS

Simple to install and maintain, interactive touchscreens are ideal for collaboration and engagement in offices, classrooms, and public spaces.

Touchscreens and interactive displays provide a fast and intuitive interface for users, and can greatly enhance user and customer interactions. Users simply touch the display to make selections – no keyboard is required, saving space and complexity.

Interactive displays are versatile for any environment; from a meeting room and hotel lobby, through to a classroom, waiting room or airport.

Whether you're looking for a seamless teaching and learning experience that brings content and classroom interactivity to life, or an exciting way to engage customers, we Focus Integrated Systems (FIS) offer a wide range of high performing and durable touchscreens to meet your requirements.
